20 Demboka - Booked
at Demboka Hotel by
19.30.

5

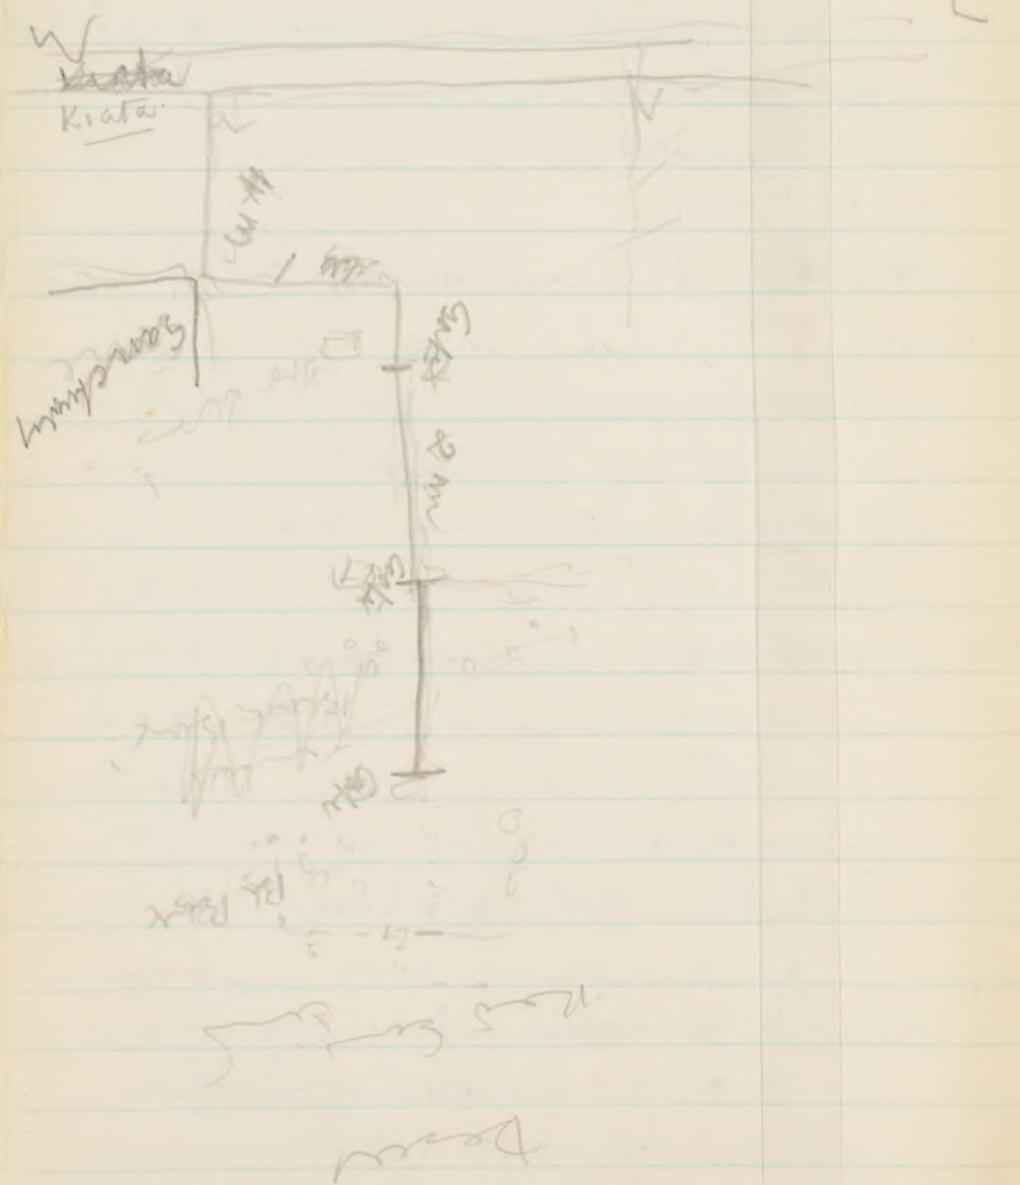

after tea, to Bill & from
Middleton's place for evening.
Spoke on phone to Mr. Hope,
F & G Inspector Horstman phone 620
re possibility of obtaining from
him specimens of gnat -
which forwarded to museum if
available.

End Points of interest during the
day: -

- 1 Fairly extensive overlap of
range of Black & WB magpies -
around L - Perry - . . .
Imperial Cat wh.-backed
extends much farther north
of divide than BB extends
south of it
- 2 Cockshells fly, ^{more open} generally,
south of Melton
- 3 Large number of tracks
- Wallaby - Kangaroos &
Foxes - Wallaby
area south.

full cooperation with ending on
May 1st, a very fine solo
concert. Very surprised
to open show with such a

Carries on - and a
matter of great joy
has been disturbed only by -
P. P. on the number of which
we could not - however -
know for sure by communication
with you or any other
with whom I have spoken but I guess
he may be few minutes
in front of me in the left seat
but with engine running -
I think there's no
time afford on your - except like
most drivers who don't know
yourself - I don't know
what you mean - but
the right hand - local prop
and the left - other prop
opposing each other had not
been passed before first - no engine
had started and the engine too
of course without outside work
or disturbance when both engines
are in a good opposition with
the sea.

Local prop must have been
rotated but probably not so fast
by P. P. opposed - opposed back &
so far back & by so much

106

S F H C Rubberage ✓
Wrote to R. T. Shandlin
about his paper "A Comparison
of the properties of the
various rubbery substances
which may be used for the
manufacture of the
rubber articles from

H.F.T. & N.J.F. & V.H.

Have seen it and consider it
a generally valuable & of value
to the scientific party.
I am enclosing a copy of the article
of V.H. & N.J.F. which
have been published in V.H.'s newspaper &
has agreed well with me. ✓
Very, I am pleased to find,
it is a good problem and
of being a very useful
for your collection, as well as
for your study about it.

people about 800 to be seen
of which the dogs were
either grey or black and
each with a small bright
red dot on its middle finger
only one dog was brown
but only one red
There were also 2000
black & white dogs
from one million to two
million but with about
one million of red & yellow
or orange dogs
also some white dogs
and some black &
brown dogs.

I suggest that the experiment
be performed next to another
experiment. Perhaps it will then
result in a positive answer
as men will follow quickly

and understanding between
him & you to expand
and not to marginalize
the opposition people. Mr. H. M.
H. E. & N.T. being a part
of being the dominating
body & one of the most
responsible -

Mr. N. T., for his responsible
opinion on Self Govt. did
sympathize with the opposition,
of U.N.L. people, especially
when he said it was not
nat. hist. but it consider-
not to be the P.D. under
governor of Bihar will be
capable of commanding
popularity & will
surely bring on
new bad mis-operations as
a solution is hard & still
problem

~~Antwerp letter~~ OK: original

Apr 27th Sun - very
typical day collected from
H.P. who has got back
and done his work

13 or 14 miles S. Very following
country on both sides. The land
is flat and low -
but dry -
and low ground

What follows here is the same
as in the valley

No very large older trees
but some good old

White-barked Boxwood

2-3 m. later more typical
valley of course
soil (brown soil) and
then come in the valley of
old white Boxwood
No oaks

In running to H.P.

for tea & take by
bus to Beijinger station by
catch train - in time
sleeping well next morning
Board train at 11 AM for
mon left 25th. The route
of the plan - worked
at Qinhuang and so
over 9000

14 To Toowong - 6.10.65

Red Whiskered Bulbul

(24,3757)

1100 L 252 through
(was over wall.)

Watched 2 P. forensis
in back yard - very
periodically come down

Speed is low ^{on crevices}
^{when whiskered by}
wall: But on back

tree - bushes but
small - much

Smaller than the white
below it. Dusky
clearly noticeable -

Clubs tail feathers
white tipped ^{above &} ~~as well~~
~~So do~~ below

grey and brown - Slight

Call: Short shrill
unusually whistled
song but was both
says 5 note whistle
as well

soft chirp, i male.
Red-wanted went quite
visible from side
Aggressive towards
Gannows

Note: The birds were not marked
on my arrival. Mrs Hall
gave several short burst whistles
from a low wood
calmness immediately
appeared closely followed
by the Second. Only
2 seen

144 To Adelaide
